

Linux Basic Commands

Definition

Linux is a free and open-source operating system based on the Unix architecture.

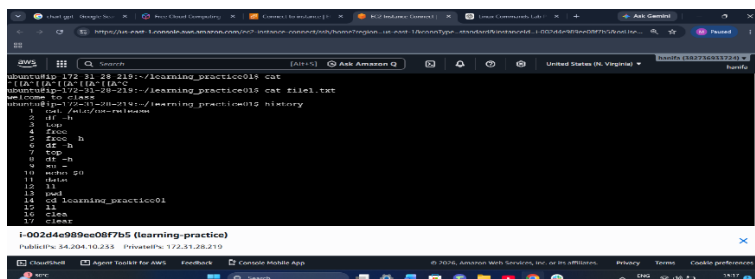

Today I Executed the Following Linux Commands

1. **echo \$0** – Displays the current shell (for example, bash).
2. **pwd** – Displays the present working directory.
3. **ll** – Displays a detailed list of files and directories (alias for ls -l).
4. **ls -ltr** – Lists files and directories in long format, sorted by modification time (oldest first).
