

EOD Report – AWS VPC

Date: 31-Aug-2026

Task: VPC Networking

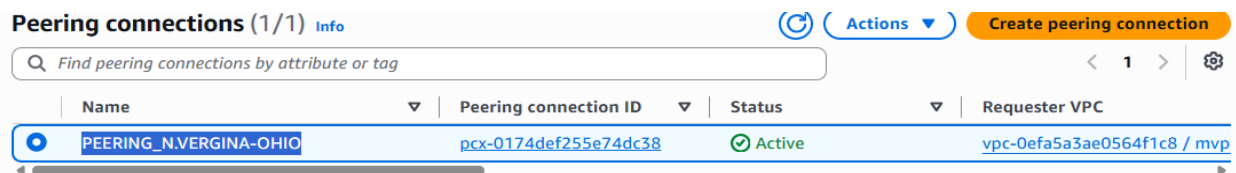

1. Create VPC

- Created **1 VPC**
- CIDR: 192.128.0.0/16
- Created **1 Public Subnet**
- Created **1 Private Subnet**
- Created and attached **Internet Gateway**
- Created Public and Private Route Tables.

2. Cross-Region VPC Peering

- Created another VPC in a different AWS Region.
- Created **VPC Peering Connection** between both VPCs.
- Accepted the peering request.
- Added routes for communication between both VPCs.

3. Cross-Account VPC Peering

- Created VPC Peering with a friend's AWS account.
- Friend accepted the peering request.
- Added required routes in both VPCs.

Find peering connections by attribute or tag					< 1 > ⚙	
Name	Peering connection ID	Status	Requester VPC	Acceptor VPC		
from verinia 🔗	pcx-0174def255e74dc38	Active	vpc-0efa5a3ae0564f1c8	vpc-0badc7		

4. Transit Gateway

- Created **Transit Gateway**.
- Created **VPC Attachment**.
- Added the required route through Transit Gateway.

5. VPC Endpoint

- Created an **S3 VPC Endpoint**.
- Connected the endpoint to the **Private Route Table**.
- This allows private subnet resources to access S3 without going through the Vpc transit gateway and Vpc Endpoin is pending not post vedio

EOD Summary:

Completed VPC creation, cross-region and cross-account VPC peering,
