18. `head -3 /var/log/syslog` = Displays the first 5 lines of a file.
19. `tail -3 /var/log/syslog` = Displays the last 5 lines of a file.
20. `tail -f /var/log/syslog` = Monitors a file for new content in real time.

## 21. INSTALL apache2 and nginx

- `sudo apt update` = Updates the package list.
- `sudo apt install nginx -y` = Installs Nginx.
- `sudo systemctl start nginx` = Starts the Nginx service.
- `sudo systemctl stop nginx` = Stops the Nginx service.
- `sudo systemctl restart nginx` = Restarts the Nginx service.
- `sudo systemctl status nginx` = Checks the Nginx service status.
- `sudo systemctl enable nginx` = Enables Nginx to start at boot.

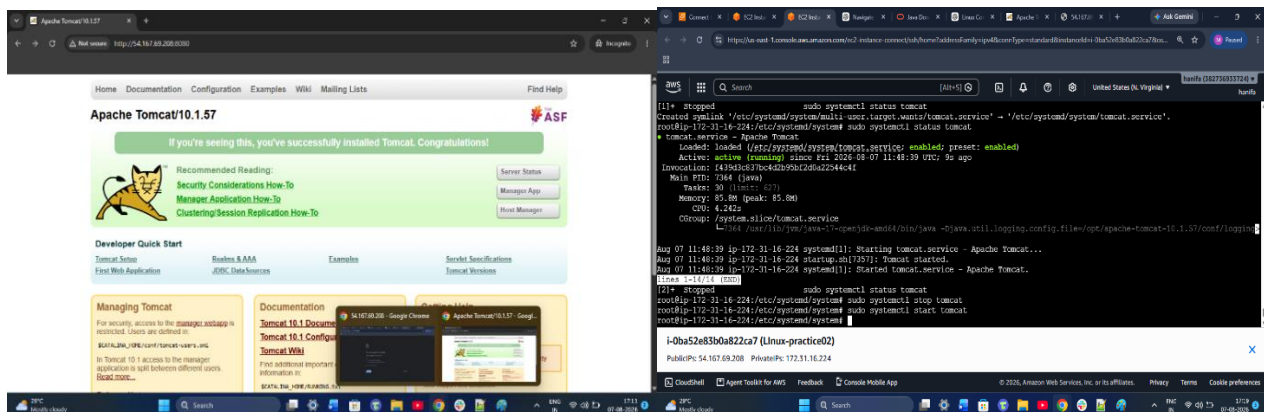

a.

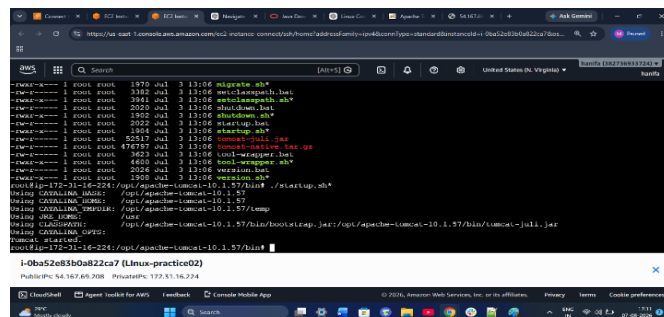

## 22. Downloads Apache Tomcat

- `sudo apt install default-jdk -y` = Installs Java for Tomcat.
- `wget https://downloads.apache.org/tomcat/tomcat-10/v10.x.x/bin/apache-tomcat-10.x.x.tar.gz` =
- `tar -xvf apache-tomcat-10.x.x.tar.gz` = Extracts the Tomcat package.
- `sudo mv apache-tomcat-10.x.x /opt/tomcat` = Moves Tomcat to the /opt directory.
- `sudo chmod +x /opt/tomcat/bin/*.sh` = Makes Tomcat scripts executable.
- `sudo nano /etc/systemd/system/tomcat.service` = Creates the Tomcat systemd service file.
- `sudo systemctl daemon-reload` = Reloads systemd after creating the service file.
- `sudo systemctl start tomcat` = Starts the Tomcat service.
- `sudo systemctl stop tomcat` = Stops the Tomcat service.
- `sudo systemctl restart tomcat` = Restarts the Tomcat service.
- `sudo systemctl status tomcat` = Checks the Tomcat service status.

- `sudo systemctl enable tomcat` = Enables Tomcat to start at boot.
- `sudo systemctl disable tomcat` = Disables Tomcat from starting at boot.
- `journalctl -u tomcat` = Displays Tomcat service logs.
- `journalctl -u nginx` = Displays Nginx service logs.

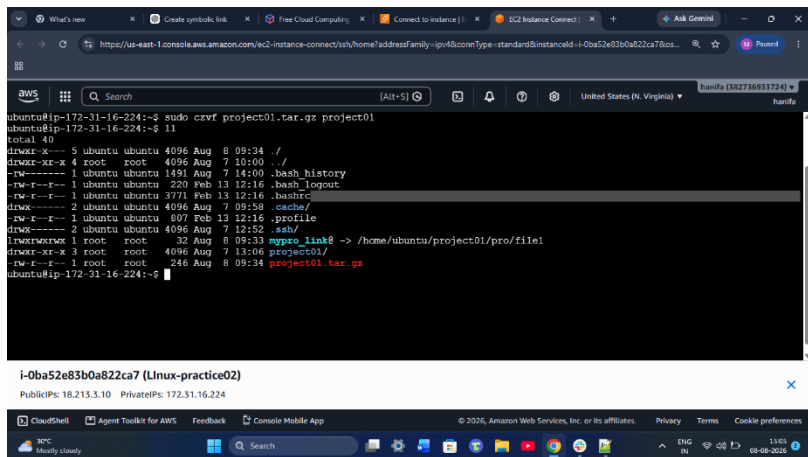

a.

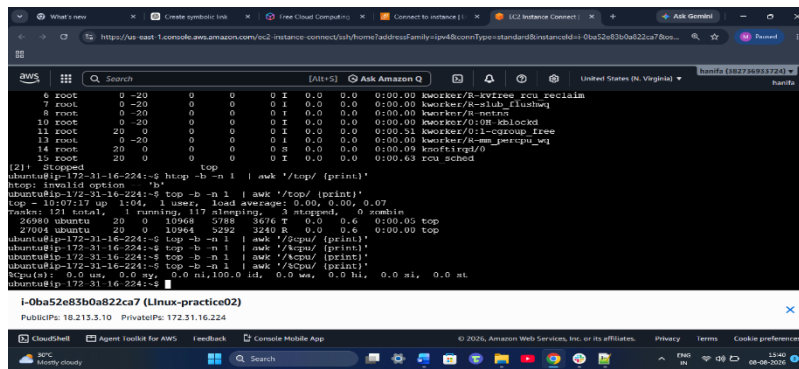

23. Create a symbolic link.

24. Compress and decompress files using tar.

25. Print specific columns from a delimited file.

26. Filter and print lines based on a specific pattern or condition.

27. Count the occurrences of a specific pattern in a file.

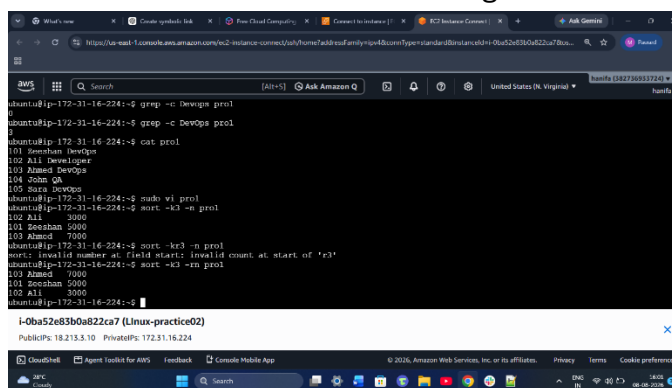

Command `wc`

`grep -c 'devop' file.txt`

28. Sort lines based on a specific field or column.

Command `sort -k2 -n file.txt` for smallest to biggest

`sort -k2 -rn file.txt` for big to small

29. Merge multiple files based on a common field or column.

Join `file1.txt file2.txt`

30. Set up SSH password less authentication.

31. Configure and secure a MySQL Database.

32. Calculate and print the average, sum, or other statistics of a column.

33. Perform string manipulation, such as extracting substrings or changing case.

34. Substitute text in a file using search and replace.

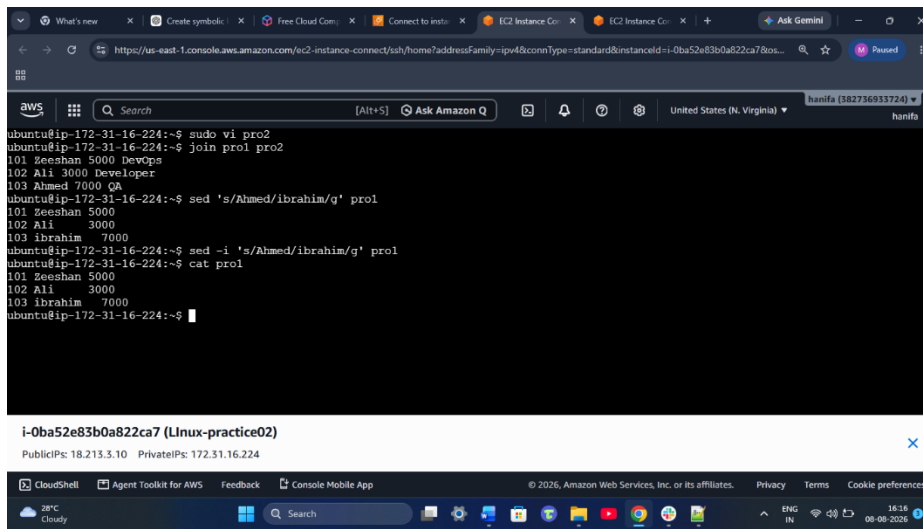

35. Delete specific lines based on a pattern or line number.

36. Append or insert text before or after a specific pattern or line.

37. Print only specific lines from a file.

38. Copy file from linux to windows machine

39. 5 use cases for AWK and 5 use cases for sed

40. top, free -m, df -h

41. ps -ef

42. kill or kill 9
